

# NISHI SHEEBA

DevOps & Systems Engineer | Linux Automation & Production Support

Vancouver, BC, Canada | +1 (778) 522-3109 | nishisheeba196@gmail.com | linkedin.com/in/nishi-sheeba-89243b18b

---

## PROFESSIONAL SUMMARY

Systems Administrator and Infrastructure Engineer with 3+ years of experience supporting enterprise-scale Linux environments, production systems, and IT operations within a managed services setting. Skilled in system administration, automation, monitoring, and incident management across hybrid infrastructure environments. Strong experience in Ansible-based automation, Python/Bash scripting, and ITSM workflows using ServiceNow and Jira. Proven ability to maintain system reliability, reduce operational issues through automation, and support 24/7 production environments. Canadian Permanent Resident authorized to work without sponsorship.

---

## CORE SKILLS

**Operating Systems & Infrastructure:** Linux (RHEL, CentOS, Ubuntu) · Windows Server (basic) · VMware · Oracle WebLogic · Apache Tomcat · System Patching & Hardening

**Automation & Scripting:** Ansible (Red Hat Certified) · Bash · Python · PowerShell (basic) · Configuration Management · CI/CD Pipelines

**DevOps & Cloud:** Jenkins · Docker · Git/GitHub · Google Cloud Platform (GCP, Associate Certified) · Terraform (in progress)

**Monitoring & Incident Management:** System Monitoring & Alerting · Log Analysis · Root Cause Analysis (RCA) · ITIL · ServiceNow · Jira · SLA Management · On-call / 24x7 Production Support

**Soft Skills & Collaboration:** Runbook & Documentation Authoring · Cross-functional Collaboration · Agile (Scrum/Kanban) · Confluence

---

## PROFESSIONAL EXPERIENCE

**System Engineer** | Tata Consultancy Services | *June 2021 – August 2024*

- Managed and supported **enterprise-scale Linux infrastructure (400+ servers)** across production and non-production environments, maintaining **99.9%+ system availability** in a managed services setup.
- Led **incident management and root cause analysis (RCA)** for Oracle WebLogic Server and Apache Tomcat environments, reducing **mean time to resolution (MTTR) by ~30%** and improving overall service stability.
- Automated **SSL certificate lifecycle management** across 400+ servers using Ansible and Bash, cutting **manual effort by 40%** and eliminating deployment errors.
- Designed and implemented **monitoring and alerting systems** for CPU, memory, disk, and application health, enabling **proactive issue detection and reducing critical incidents by ~25%**.
- Handled **end-to-end ITSM processes** using ServiceNow and Jira, consistently meeting **SLA targets (>95% compliance)** across incidents, changes, and service requests.
- Developed **automation scripts (Python & Bash)** to streamline routine system administration tasks, reducing **manual workload by ~35%** and improving operational efficiency.
- Provided **24/7 on-call production support**, resolving high-priority incidents and ensuring **near-zero downtime for business-critical applications**.
- Awarded **“Star Performer of the Month” (2x)** and recognized on the TCS Wall of Fame for delivering measurable improvements in automation and operational reliability.

---

## PROJECTS

### Enterprise Linux Automation (Ansible-based)

- Architected **15+ modular Ansible roles and 40+ reusable playbooks**, enabling scalable automation across multiple environments

- Built **parameterized deployment workflows** used across **5+ environments**, reducing configuration inconsistencies by **~30%**
- Integrated automation with Git-based version control, improving **change traceability and rollback efficiency by ~25%**
- Created standardized templates and documentation, reducing **new team member onboarding time by ~35%**

#### Production Monitoring & Incident Response Optimization

- Defined **alert thresholds and escalation workflows** covering **50+ system metrics and services**, reducing alert noise by **~20%**
- Developed **10+ runbooks and troubleshooting guides**, improving incident handling consistency across support teams
- Implemented **log correlation techniques** to identify recurring issues, contributing to a **~15% reduction in repeat incidents**
- Improved operational visibility for **cross-functional teams (Dev, Ops, Support)**, accelerating issue triaging and resolution time

#### Middleware Deployment & Troubleshooting (WebLogic / Tomcat)

- Coordinated **20+ application deployments** across staging and production environments with improved configuration alignment
- Performed **pre-deployment validation checks**, reducing deployment-related failures by **~25%**
- Identified and analyzed **performance bottlenecks** (CPU, memory, thread usage), improving application responsiveness
- Collaborated with engineering teams to enhance **release stability**, increasing deployment success rate to **~95%+**

### CERTIFICATIONS

---

- Red Hat Certified Specialist in Ansible Automation - Issued October 2023
- Google Cloud Certified - Associate Cloud Engineer - Issued May 2023
- Terraform Associate (HashiCorp) - In Progress
- Kubernetes (CKA) - Planned

### EDUCATION

---

**Bachelor of Engineering** | *Aug 2017 – Apr 2021*

Velammal Institute of Technology | CGPA: 8.0

### ADDITIONAL INFORMATION

---

- Work authorization: Canadian Permanent Resident
- Location: Vancouver, British Columbia
- Availability: Open for on-call and shift-based production support roles
